## CLAIM AMENDMENTS

1. (currently amended) A lamp crystal comprising:

a transparent body formed with an outwardly open bore and

having an outer surface having that has a region with a

semitransparent matte finish and that is substantially smooth,

transparent, and polished except at the matte-finish region;

means for suspending the body from above; and

a light-emitting diode fixed in the bore.

- 2. (canceled)
- 3. (currently amended) The lamp crystal defined in
  claim [[2]] 1 wherein the matte-finish region extends peripherally
  around the body.
- 4. (original) The lamp crystal defined in claim 3
  wherein the body is formed with a pair of edge bevels that
  constitute the matte-finish region.
- 5. (original) The lamp crystal defined in claim 1 wherein the bore has a matte-finish internal surface.
- 6. (original) The lamp crystal defined in claim 5 wherein the diode is a snug fit in the bore.

- 7. (original) The lamp crystal defined in claim 5,
- 2 further comprising
- a mass of transparent potting between the diode and the
- 4 internal surface of the bore.
- 8. (original) The lamp crystal defined in claim 1
- wherein the diode carries a lens.
- 9. (currently amended) The lamp crystal defined in
- claim 1 wherein the diode has electrical supply wires sufficiently
- strong to hang the crystal by and constituting the means.
